

Research Demonstrates Financial Value

Study Results Show Vast Improvement in Collections

For 40 providers in eight clinics, collections increased more than 15% with implementation of the services and software of Compass Billing Service Corporation.

Revenue Enhancement

The results of this study show that collections for 40 providers in eight clinics improved by more than 15%. **Compass Billing Service Corporation utilizes specially designed software that tracks every procedure. This ensures that payment from the insurance company is made in accordance with the terms of the contract between the provider and insurance company. Appeals are generated immediately.**

The financial benefit for these providers is significant. The services and software of Compass Billing Service Corporation had a compelling impact on the bottom line for all study participants, as the 15% improvement in collections represents millions of dollars.

Summary: The purpose of this case study was to examine the operating results of collections for 40 providers at eight clinics. The intervening factor was the implementation of Compass Billing Service Corporation as the provider of billing services versus in-house billing.

The Baseline: The "Medicare Baseline" was established to eliminate all outside variables from skewing the results. Medicare has a reimbursement rate for each procedure performed, and for purposes of this study, 100% is considered to be that rate. Collections greater than 100% are due to the fact that most carriers pay more than Medicare. The study included all procedures and all insurance carriers.
